A

COVER LETTER

Apple

Senior Social Strategist

To the team at Apple,

Thank you for taking the time to consider me as a candidate for this role. I have applied for multiple roles at Apple, all of which I strongly believe that I would excel at given my background and experience. I would be honored at the opportunity to have a discussion with the hiring team for this position.

Social strategy is where brand instinct, cultural fluency, and data discipline have to coexist and reinforce each other. I have spent my career at that intersection: building social and content programs for major consumer brands, developing the kind of consistent brand voice that earns communities rather than just audiences, and staying relentlessly curious about what is actually happening in culture and on platforms.

At Margle Media, I led organic social and content strategy for brands including Johnsonville, Post Consumer Brands (Fruity PEBBLES and Honey Bunches of Oats), and Frito-Lay, developing channel-specific strategies, reviewing creative briefs, and the editorial frameworks that kept teams and clients aligned. I understand both the high-level strategy and the granular execution: what makes content stop a scroll, how platform algorithms reward consistency, and how to build a brand voice that

Got it

image and caption, what belongs and what should be cut. I know what great visual content looks like, and I know how to brief creative teams to get there.

Apple's social presence has always been a benchmark for how a brand can show up on platforms with restraint, originality, and genuine confidence. Contributing to that standard, helping shape how the world's most iconic consumer brand tells its story in real time, would be a privilege.

The Value I Bring to the Table

A mechanical engineering foundation means I think in systems and constraints; I see the structure underneath things. A decade of agency work means I know how to operate under pressure, serve demanding stakeholders, and ship. And a year of daily, deep work building AI-native infrastructure means I'm not just using these tools. I'm building on top of them.

I bring the unusual combination of builder, operator, and strategic thinker to every problem. I can go deep technically and surface commercially. I've built things from zero, run teams, served enterprise clients, and built the kind of AI infrastructure most people are still theorizing about.

What makes me effective isn't just the range of skills: it's how I operate. I'm reliable and consistent. I set clear goals, manage my time and priorities across competing workstreams, and follow through. I've led teams through ambiguity, built goal-setting frameworks that keep everyone aligned, and earned trust by being the person who always comes prepared and always delivers. Teamwork isn't just something I participate in: it's something I actively build. Strong task and time management, a bias toward clarity, and genuine accountability are at the core of how I work.

Above all, I have a talent for distilling complexity into clarity: reading a complicated situation,

Experience

2025–Present

Founder

Good at Scale Studio

Building AI-native operational infrastructure: autonomous agents, venture automation, intelligence systems. Running a 12x12 venture studio: 12 ventures in 12 months. Designing agent systems, leveraging the MCP, and the operational layer for how small teams scale. The entire site and platform was designed, developed, and built by me with the support of Claude Code and other technology integrations.

2025–Present

Course Creator

Foundations of Architecture

Built and launched an online architecture education platform as a self-funded, solo-built product. Curriculum design, content production, e-commerce, and growth. Built with Claude Code, Next.js, Supabase, Stripe, and other autonomous and third-party integrations, this platform teaches students how to design their own dream home or space. On the backend, the platform was built to support an Admin Dashboard, with a Strategy Co-Pilot, Social Hub, Community Engagement, and a Course Content Editor, among other features.

2017–Present

Co-Founder, President & COO

Margle Media

Built the agency from zero to seven figures with no outside capital. Directly managed or built every function: sales pipeline, account management, P&L, financial forecasting, cashflow, AR/AP, invoicing, utilization and margin reporting. Grew and managed a leadership team with direct reports across creative, media, strategy, and operations. Clients include Cousins Subs, Johnsonville, Frito-Lay, Florsheim, Instant Pot, Stella & Chewy's, Quest Products. Personally managed client strategy for Fortune 500 and regional brands across paid search, paid social, organic social, and omnichannel. Built agency operating systems, reporting infrastructure, and client-facing analytics frameworks. Handled HR, IT, vendor relationships, legal coordination, and agency contracts. Ten years of touching every aspect of a full-service agency. This is the operating credential.

Engineering fundamentals: thermodynamics, materials science, systems design, tolerance analysis, process engineering. The training that taught me to think in constraints and design solutions that hold up under pressure. My personal biggest takeaways from my time at Marquette were learning how to learn, quickly and efficiently, and the cultural exposure that came from a study abroad semester in Florence, Italy.

Skills

Digital Marketing

- Paid Search / SEM
- Paid Social
- Organic Social & SEO
- Programmatic/CTV Advertising
- Omnichannel Strategy
- Performance Marketing
- Creative Strategy
- Attribution Modeling
- Analytics & Reporting
- Website Optimization
- KPI Development & Tracking
- Customer Journey Mapping

Operations

- Business Operations
- Business Strategy & Planning
- Process Development
- Workflow Automation
- Capacity Planning
- Vendor Management
- SOP Development
- Leadership Team Development
- Tech Stack Management

AI & Automation

- LLM Integration
- Agent Systems
- Prompt Engineering

Client Management

- Account Management
- Client Strategy
- Retention Strategy
